MANAGEMENT TRIAL BALANCE – June 2002./.

Comments on the performance in June 2002./.

Introduction./.

Centrais Elétricas de Santa Catarina S.A. – Celesc is an electric energy provider for the State of Santa Catarina, servicing 98% of that market and 1,800,095 consumers. It currently generates 2.3% of the energy required. Tractebel is still Celesc's main supplier, providing 73.7% of the energy required, while the energy purchased from Itaipú represents 22.4% of this total. The remaining amount needed by Celesc (1.6%) is complemented by [sic]./.

Tariff Evolution:

Taking into account the provision and supply of electric energy, the ICMS [Value-Added Tax on Sales and Services] deducted, the average tariff for the second quarter of 2002 was R\$128.76/MWh, which represents an increase of 22.08% on the average sales tariff of R\$105.47/MWh observed in the second quarter of 2001./.

The increase of 22.08% in the average sales tariff in the second quarter was due mainly to the readjustment of 20.72% on the provision tariffs charged as of August 7, 2001, in addition to the following increases in consumption in June: residential class, 6.42%; industrial class, 5.41%, and commercial class, 9.80%./.

The average tariff of the energy purchased including transmission costs was R\$61.31/MWh in the second quarter of this year, with an increase of 10.01% as compared to the second quarter of the previous year, which was R\$55.73/MWh. This increase in the cost of the energy purchased is due mainly to the variation in the exchange rate and the increase of the real/dollar rate of exchange in June 2002./.

Comments on the Balance Sheet (Assets and Liabilities):/.

The Assets underwent a 1.3% positive variance in the last quarter, which was due mainly to: a) Notes Receivable: due to the increase in credits derived from consumers' installments; b) Taxes to be Recovered: increase resulting from ICMS credits that accrued on the acquisitions of assets recorded in Fixed Assets; c) Accounts Receivable from the State of Santa Catarina: the increase refers to interest and monetary indexation that accrued on the debt; d) Fixed Assets: increase resulting from investments made on that period./.

The Liabilities and Stockholders' Equity were positively influenced by the following factors: a) Debt Charges: the increase was due to the increase in the dollar rate of exchange in the last quarter; b) Taxes and Social Contributions: basically due to the ICMS accrued on the increase in energy consumption; c) Estimated Liabilities: increased because of the reclassification and provisioning of Annual Bonus and Wage Bonus; d) Long-term Loans: due to the increase in the dollar rate of exchange, which reflected on the agreements bound by the foreign currency; e) Tax Liabilities:

Lan

the increase was due to the deferred IR [Income Tax] and CS [Social Contribution] on the CRC income; e) Pension Fund: the increase refers to the debt renegotiation, transferring amounts from short-term to long-term liabilities; f) Net income for the year: a profit of R\$10.9 million impacted on the Stockholders' Equity in this quarter./.

Comments on Economic and Financial Performance./.

Celesc ended the first semester of 2002 with retained earnings of R\$60.8 million, which represented a variation of 1,343.7% as compared to the earnings recorded in the same period of the previous year (R\$4.2 million), with the result of a positive profitability of 5.7% on the Stockholders' Equity declared on June 30, 2002, which was R\$1,123.2 million./.

In the first semester of 2002, the net revenue from sales and/or services reached the amount of R\$831.8 million, which represented a 21.3% increase when compared to the same period of the previous year. This increase resulted from a 2.8% market growth, especially in the public and industrial classes, which increased by 6.9% and 6.2%, respectively, as well as from the tariff readjustment occurred in August 2001./.

Due to the good performance of the net revenue from sales, the service income was also positive (R\$129.7 million), and represented a 246.0% increase when compared to the same period of the previous year. As to the financial income, it was negative by R\$36.4 million, mainly due to the monetary variations related to the exchange rate./.

Financial Investments Income	177	7	2428.6%	0.0%	184	64	187.5%	Increase resulting from revenue originating from interests and monetary indexation of financial investments.
Interest on Accounts Receivable from the State	12,075	11,710	3.1%	2.9%	23,785	20,424	16.5%	Increase resulting from the revenue originating from interests of 6.828% p.a. accruing on the remaining balance of CRC paid to the State Government. It also includes interests of 10% p.a. accruing on loans granted to the State Treasury.
Monetary Variance on Accounts Receivable from the State	9,429	13,188	-28.5%	2.3%	22,617	21,557	4.9%	Increase resulting from the revenue originating from monetary indexation (INPC) accruing on the remaining balance of CRC paid to the State Government. There was an increase because the INPC variance in June 2002 was higher than that of June 2001.
Monetary Variance and Moratorium Additions on Energy Sold	4,184	4,863	-14.0%	1.0%	9,047	10,518	-14.0%	Decrease due to the revenue originating from interest and monetary variance according on the balance of credits from sale of electric energy to consumers and resellers, because there was a reduction in the interest rate, monetary indexation and reduction of default in that period.
Monetary Variance on Exchange Rate	820	8,143	-89.9%	0.2%	8,963	4,522	98.2%	Increase resulting from the exchange variance on Loan/Financing agreements, as well as the purchase of electric energy in foreign currency. In accord with the Federal Revenue Service, when the dollar rate of the previous month is higher than in the subsequent month, the financial gain is recorded in this item. One can observe that the 1st semester of 2002 presented higher financial gains than the fiscal year of 2001.
Other Financial Income	2,131	2,091	1.9%	0.5%	4,222	4,647	-9.1%	Decrease resulting from the recording of income originating from fines and moratorium additions accruing on the sale of electric energy to consumers and resellers which was lower than in the fiscal year of 2001.
